

ECONOMIC SNAPSHOT

Clearway Energy is developing a solar project in Lincoln County that will deliver significant economic benefits to the county, as well as reliable domestic energy through working with local landowners who have signed voluntary private property leases to participate in the project.

This project will deliver:

- A **\$3M Community Benefit Fund** at the start of construction, established and operated by community members to respond to needs in Lincoln County.
- At least **\$600,000 in fixed annual revenue** and **over \$15.7+ million over project life** to Lincoln County taxing jurisdictions. This is based on a proposed PILOT rate of \$3,500/MW in years 1-20 and \$1,000/MW in years 21-40, and Clearway's intent to build at least 175 MW of energy generation in Lincoln County.
- About **300 construction jobs** during the building of the project.
- **Annual lease payments** to local landowners, who have been supporting this project as early as 2020.

This solar project would bring at least \$400 million in private investment to Lincoln County. The project will bring considerable benefits through jobs, community support, lease payments and new tax revenue with no infrastructure demands, noise, emissions or traffic.

ABOUT CLEARWAY ENERGY

Clearway Energy Group is leading the transition to a world powered by clean energy. Along with our public affiliate Clearway Energy, Inc., our portfolio comprises approximately 11.7 GW of gross generating capacity in 26 states, including 9.1 GW of wind, solar, and battery energy storage assets, and over 2.6 GW of conventional dispatchable power generation providing critical grid reliability services. As we develop a nationwide pipeline of new energy projects for the future, Clearway's operating fleet generates enough reliable electricity to power more than 3 million homes today. Clearway Energy Group is headquartered in San Francisco with offices in Denver, Houston, Phoenix, Princeton, and San Diego. For more information, visit clearwayenergygroup.com.
